OBJECTIVE **Phase 1 Environmental Assessments**

QUALIFICATIONS **Due Diligence Environmental Assessments**
Environmental Compliance Auditing/Inspection

ACCOMPLISHMENTS

- Minimized environmental liability and increased environmental compliance of over 450 industrial, commercial and large-scale residential properties throughout the continental United States by visual observation, rigorous investigation and professional evaluation

- Conducted 680 regulatory agency environmental compliance inspections of major plating, metal finishing, pharmaceutical, brewing, electrical utility, food processing, water filtration and groundwater treatment facilities as part of federally mandated program to ensure industrial compliance with POTW and EPA/local permit standards

- USPHS Engineer at U.S. Department of Health and Human Services (DHHS) facility in Bethesda, MD preparing emergency/oil spill/contingency plans and conducting environmental compliance audits of DHHS facilities in Maryland, North Carolina and Montana

- Increased confidence of Vice-President at a major California Bank by reviewing over 75 Environmental Assessment Reports and producing technical evaluation

- Enhanced environmental compliance at over 20 solvent, oil and metal recovery facilities in Colorado, Texas and California by auditing each facility based upon multimedia audit protocol

- Conducted facility-wide environmental compliance audit of a major aerospace manufacturing facility in Redondo Beach, California

- Increased environmental compliance and decreased environmental liability at four offshore oil production islands off the coast of Southern California by assessing environmental liability and regulatory compliance
