## EDUCATION

---

University of West Georgia, Bachelor of Science (B.S.) Environmental Science  
2009-2013

## EXPERIENCE

---

Mr. Welsh has been an environmental consultant since 2013. Mr. Welsh started his career on the East Coast prior to relocating to the Western Region to expand his skills and career. Mr. Welsh has focused largely on environmental investigation, remediation, and permitting projects. Mr. Welsh has successfully completed many large-scale projects for some of the nation's largest firms including one of North America's largest private utility providers, Fortune 500 companies, and one of the world's largest livestock producers. Mr. Welsh has completed various environmental projects, including Phase I Environmental Site Assessments in thirty-five (35) different states. Mr. Welsh serves as the Project Manager for a variety of environmental projects including environmental assessments (Phase I, Phase II ESAs) soil gas sampling (sub-slab, passive, active, etc.), soil and groundwater investigation and remediation, fuel and industrial site decommissioning, environmental permitting projects, and various Industrial Hygiene projects. Mr. Welsh also manages environmental projects under several Federal Brownfield Grants administered by EPA Region 9. Mr. Welsh has gained valuable experience in his 7+ year career working with a variety of clients around the United States and has always prided himself on keeping up to date with new environmental regulations, technologies/methods, and the relationship between them.
