PG Associates, LLC

2 Nightingale Lane
Greenville, South Carolina 29607
(864) 414-3847

Mr. Waldrep is currently an independent, professional geologist with over 33 years of geosciences and environmental consulting and management experience; including Phase I and Phase II ESAs, and assessment and remediation of petroleum sites, brownfields, CERCLA projects and coal ash basins.

Mr. Waldrep returned to independent consulting in April 2020.

Professional Experience

2015 – 2020 **SynTerra – Site Lead/Senior Geologist**
Greenville, SC

Mr. Waldrep returned to SynTerra to take on the new challenge of directing assessment and cleanup of large coal ash basins in North Carolina. Assessment of metals in soils and groundwater were the focus of these projects. Mr. Waldrep was Site Lead for projects located in both the North Carolina Coastal Plain and Piedmont geophysical provinces.

2020 – Present

2012 - 2014 **Independent Consultant** – Mr. Waldrep provided geosciences/environmental support to industry clients and consultants. Additionally, he provided technical writing and editorial support for government services proposals contractors.

2006 – 2011 **SynTerra – Senior Project Manager**
Greenville, SC

Brownfields redevelopment and CERCLA Superfund projects were a primary focus at SynTerra. Additional duties included marketing, presentations and proposal preparation. Significant milestones and achievements included:

- Prepared winning proposals for three large Brownfield assessment projects and one cleanup project
- Successful cleanup of two municipal brownfield properties
- Completion of an EPA Five-Year Review Response at a large Superfund remediation site
- Managed operation, data collection and reporting for a large Superfund groundwater remediation system within a fractured bedrock aquifer
- Risk-Based Cleanup presentation at a regional EPA conference
- Community outreach presentations related to brownfields projects.

2004 – 2006 **Groundwater & Environmental Services, Inc. – Sr. Project/Site Ops. Mgr.**
Tampa, FL

As the first employee hired by GES in the state of Florida, Mr. Waldrep was tasked with establishing a company presence in the Tampa Bay and the Florida west coast region. Key accomplishments included:

PERRY B. WALDREP
PG Associates, LLC

2 Nightingale Lane
Greenville, South Carolina 29607
(864) 414-3847

-
- Established a relationship with local representatives of national petroleum clients; creating a backlog of projects of over \$1,000,000
 - Created local office and formed a staff of 5 employees
 - Project management of petroleum cleanup projects.

1997 – 2004 **ATC Associates, Inc.** – Sr. *Geologist*

Tampa, FL

Managed various environmental assessment and remediation projects, Key projects included:

- PCB assessment and remediation – power plant
- Cyanide remediation - former manufactured gas plant
- Phase I/II-fertilizer production plant
- Phase II ESA – dry cleaner facilities
- Petroleum assessments – major oil client facilities

1992-1996 **Flour Daniel GTI, Inc.** - *Lead Geologist*

Tampa, FL

Managed assessment and remediation projects for major petroleum and industrial clients. Responsibilities included coordination of remedial design work plans, supervising installation operation and modification of in-situ groundwater and soil remediation systems.

- Obtained closure or monitoring-only status at 15 sites
- Upgraded remediation systems utilizing air sparging, soil vapor extraction, bioremediation, and dual phase extraction technologies.
- Provided technical support on various CERCLA/TSCA projects.

1991-1992 **U.S. Technical Environmental Consulting, Inc.** - *Project Manager*

Tampa, FL

Conducted UST closure and contamination assessments in Florida, Georgia, Alabama, and Mississippi. Wrote technical proposal to qualify as an approved contractor in the state of Alabama which was approved by ADEM.

1990-1991 **Bryson Environmental Services**– *Project Manager*

Birmingham, AL

Managed hazardous waste cleanup projects. Clients included steel production companies, paper production companies, rock quarries, mining companies and chemical plants.
